Cade Robinson

517-750-7017 | cipherdev17@gmail.com

Summary

Skilled full-stack developer experienced in creating performant, data-driven web applications with **React**, **Node.JS**, **MongoDB** and proficient in core **Data Structures**, **Algorithms**, and **JavaScript**.

Experience

Underdog Idols
Full Stack Software Developer | 11/2022 - Present
I was engaged to execute the end-to-end development of a website, comprising front-end, back-end, and database management. Leveraging my proficiency in **Node.JS**, **JavaScript**, **EJS**, **MongoDB**, and **Mongoose**, I transformed a pre-existing HTML template into a fully-functional, high-performance web application that can handle a large number of concurrent users (scaling over 10,000), I constantly upgraded the application to ensure it maintains a high level of scalability, robustness, and reliability.

Gratitude Token World
Backend Developer / Proton Blockchain Developer | 09/2022 - 11/2022
I played a key role in the design, development and implementation of SHIELD, a cutting-edge decentralized voting system for Gratitude Token. Utilizing my proficiency in Node.JS and JavaScript, I have leveraged Proton Blockchain's web-sdk to build a secure and transparent voting system that enables qualified members of the decentralized autonomous organization to vote on proposals that govern the project, thus promoting efficient decentralized decision-making and community participation.

State Farm
Sales Representative/Customer Service | 01/2019 - 01/2022
Handled new business acquisition, serviced existing clients and learned about business management

Education

Udemy
NodeJS - The Complete Guide (MVC, REST APIs, GraphQL, Deno) | 08/2022
Build modern, fast and scalable server-side web applications with **NodeJS**, databases like **SQL** or **MongoDB** and more. also gain understanding the NodeJS ecosystem and build server-side rendered apps, **REST APIs** and **GraphQL APIs**

Scrimba
Full JavaScript Course | 06/2022
In this course I learned the fundamentals of JavaScript from the ground up. Some of the key points from this course inlcude **Async/Await JavaScript**, DOM & State management, **Higher Order Functions**, data structures, and many more.

Scrimba
Front-end Developer Career Path | 06/2022
Packed with over 80+ hours of content I learned everything from the fundamentals of HTML and CSS as well as React, using APIs, Web architecture, Git and more

Skills

TypeScript, NodeJS, JavaScript, ReactJS, MongoDB, MySQL, Solidity, Infura, Truffle

Personal Projects
